INTRODUCTION

Vital Statistics data used to prepare this report are taken from birth, death, stillbirth, marriage and divorce certificates of these events occurring in calendar year 1980 and filed in the office of the Kentucky Registrar of Vital Statistics prior to April 1, 1981. Vital events occurring to Kentucky residents in other states, and recorded in the office of the Registrar by June 30, 1981, are also included in totals by residence.

All statistics contain variations which are the result of chance. This characteristic is of particular importance when dealing with small numbers of events. In such cases small variations are proportionately large in relation to the base figure. As an example, small changes in the number of deaths or births in small population areas or in the number of deaths from uncommon causes could result in large changes in these rates. For this reason, rates for counties with small population or other small bases should be used cautiously.

Our efforts to make this Report more useful in planning continue. Additional data tables have been included to present more comprehensive data on selected cancer deaths. Also, many of the data elements have been formatted into topical tables showing a small group of related data elements for all 120 counties within one table.

Timeliness of the data continues to be one of our greatest concerns. The time lag between the cutoff date for data being entered into the system and the publication of the Annual Report is still too great. A new data system is being developed which should greatly improve this situation within the next year or two.

Suggestions and comments on alternate methods of data presentation are welcome. Forward any suggestions to the address below.

BIRTH, STILLBIRTH, DEATH, MARRIAGE AND DISSOLUTION DATA - Kentucky certificates from calendar year 1980 entered into the Automated Vital Statistics Information System.

The Health and Vital Statistics Office publishes only a relatively small portion of the vital statistics data available. Those items included in this Report have been determined over the years and through surveys of users to be that data of most interest to the majority of users. Should you have need of more detailed analysis or of data not included here, please contact:

Many unpublished data elements are immediately available through standard computer reports and will be furnished free of charge. However, should your request for data require a special computer run, there may be a charge involved.

FOR DATA PREVIOUSLY FOUND IN THIS PUBLICATION

Past editions of this publication included some data elements which were not vital statistics data and which were obtained from secondary sources. The agencies responsible for collecting these data elements frequently publish their own reports with much greater comprehensiveness and with more current data. Consequently, the Annual Vital Statistics Report will no longer include these items. The original sources are provided for those who desire these data.

DEFINITIONS AND RATES

TOTAL BIRTHS: Live Births and Stillbirths.

LIVE BIRTH: A live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breaths or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

STILLBIRTH (FETAL DEATH): Death prior to the complete expulsion or extraction from its mother of a product of conception, having passed through at least the 20th week of gestation; the fetus shows no signs of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

RESIDENCE: Usual place of residence for person to whom event occurred. For births and stillbirths residence is defined as the mother's usual place of residence.

OCCURRENCE: Place where the event actually occurred.

RACE: Race of mother, father, or descendant is as stated on certificate. Race of child is determined from the race of the parents.

PREMATURE (LOW-WEIGHT BIRTH): Birth wherein the birth weight is equivalent to 2,500 grams or less (approximately 5 lbs., 8 oz).

ILLEGITIMATE BIRTH: Birth wherein there is no marital tie between mother and father.

INFANT DEATH: Death occurring to individual of less than 1 year of age.

NEONATAL DEATH: Death occurring to individual less than 28 days of age.

PERINATAL DEATH: Stillbirth or a death under 1 week of age.

MATERNAL DEATHS: Those deaths wherein the physician has designated a maternal condition as the underlying cause of death.

BIRTH RATE = Number of Resident Live Births X 1,000 divided by Total Resident Population.

DEATH RATE = Number of Resident Deaths X 1,000 divided by Total Resident Population.

AGE-SPECIFIC BIRTH RATE = Number of Resident Live Births for a Specific Age of Mother X 1,000 divided by Total Female Population of Specific Age.

STILLBIRTH RATE = Number of Resident Stillbirths X 1,000 divided by Total Resident Live Births.

ILLEGITIMACY RATE = Number of Total Resident Illegitimate Births X 1,000 divided by Total Resident Births.

INFANT DEATH RATE = Number of Infant Deaths X 1,000 divided by Total Resident Live Births.

NEONATAL DEATH RATE = Number of Neonatal Deaths X 1,000 divided by Total Resident Live Births.

PERINATAL DEATH RATE = Number of Perinatal Deaths X 1,000 divided by Total Resident Live Births and Resident Stillbirths.

MATERNAL DEATH RATE = Number of Maternal Deaths X 10,000 divided by Total Resident Live Births.

AGE-SPECIFIC DEATH RATE = Number of Deaths in Specific Age Group X 100,000 divided by Total Resident Population in Specific Age Group.

MARRIAGE RATE = Number of Persons Married X 1,000 divided by Total Resident Population.

DISSOLUTION RATE = Number of Persons (Divorces and Annulments) X 1,000 divided by Total Resident Population.

FIRST BIRTHS = First Births X 100 divided by Live Births.

FOURTH AND OVER = Fourth and Over Births X 100 divided by Live Births.

FERTILITY RATE = Number Live Births X 1,000 divided by number of women aged 15-44.
